HB 33 (Mason)	With respect to individuals who are participating in a substance use treatment or recovery support program, the proposed legislation seeks to prohibit life insurers from canceling, terminating, or “refusing to renew” an individual’s life insurance policy due to their participation; considering that participation in the underwriting or application process; or denying a claim due to a beneficiary’s participation in those programs. The provisions are specific to those individuals in active recovery/treatment programs and do not prohibit these considerations when applied across broader physical and mental health considerations, or individuals who are not in active recovery/treatment programs. HB 295 (Manley)	As introduced, the provisions currently require insurers to issue an irrevocable assignment of benefits to a funeral home in an amount not to exceed the purchase price of a funeral or burial expense policy. The language is intended to address a current issue with Medicaid beneficiaries seeking eligibility and avoidance of current asset limitations. Current law allows exemptions in assets up to a certain dollar amount in addition to exemptions for final expense policies that must be irrevocably assigned. ILHIC is working with HFS, the IL Funeral Directors Association and the National Academy of Elder Law Attorneys to determine language that appropriately addresses the problem.
